SUMMARY:

I am a motivated Full Stack Developer with hands-on internship experience in both frontend and backend development. I am passionate about building responsive web applications and continuously learning new technologies to improve my skills

EXPERIENCE:

A2Z IT HUB PVT. LTD - INTERN

7/2025- PRESENT

Full Stack Web Developer

A company specializing in IT solutions with a focus on web development

- Developed responsive web applications using HTML, CSS, Bootstrap
- Implemented backend logic using PHP & CodeIgniter
- Designed and integrated MySQL databases
- Fixed bugs and enhanced existing features

PROJECTS:

Hotel QR Menu System

8/2025- Present

The Hotel QR Menu System

- QR-based digital food ordering system designed for hotels and restaurants
- Customers can scan a QR code to view the digital menu without installing an app
- Reduces manual work, improves order accuracy, and provides a contactless dining experience

Solar Energy Website

10/2025- Present

Informational platform for a solar energy company

- Informational and service-based web platform for a solar energy company
- Showcases products, services, and benefits of renewable energy
- Helps customers understand solar solutions and contact the company for services
